

As a Paying subscriber to XM Radio, I don't feel that NAB, or any of their associates have the right to dictate what I can or cannot listen to. If I want to listen to traffic and weather on my XM Radio, instead of the AM or FM radio what of it? Until someone takes trash like Rush Limbaugh, Dr. Laura, or the biggest nut of all Bill O'Reilly, and the other annoying filth off of AM radio, IM not Listing to it! I don't want to hear a caller wanting to know why after 30 years of marriage, why he can't get it up! Or some dried up Republican acting like he knows every thing in the whole stinking world! These people are why I originally got an FM radio!

And now some times I don't feel like listing to Snoop Dogg talking about Crackers, Eminem Talking about his Ma Ma, and a DJ Thanking that he is Gods gift to the world. GAG ME WITH A MAGGOT!!!!
NOW, I have to listen to all this garbage for 30-40 Min. to figure out why the 101 in San Jose has turned to a Parking Lot.

Knowing all this, Why do you think I bought a XM Radio? I turn on my XM Radio and find out in a mater of 2-3 min. without any of this Harassment, and grief. If I want to listen to the rest, Its on there too. The choice is mine, I make it. Not NAB! See NAB wants us to listen to Commercials so they can make money. XM Doesn't have may commercials, so The National Association of Broadcasters is mad. They want their Finger in XM Radio so they can create the Mindless dribble there too. Make us have a limited choice so we have to listen to the talk shows or the DJ's, and "The Commercials"!! The Bread and Butter of AM and FM

Please conceder these words, and in stead of making more laws to punish the people that pay your wages, rule against the NAB who wants to Line your pockets, just long enough to get their way. Keep XM Radio and its traffic and weather channels the way they are. I pay for my programing. I don't pay for AM or FM. Please Regulate these first, and Leave Paid programing alone. The People of the United Sates of America will thank you.

James Shaw Jr.
